VOLUME 23, No. 62.

NEWS NOTES

Attendance at the Calgary exhibition and stampede last year was the third highest in the history of the annual event. During the six day entertainment 214,578 persons paid admission. This figure was exceeded only in 1928 and 1929.

Interested persons are raising a fund to appeal the Judge's decision in the MacMillan vs. Brownlow case. The fund is now near the \$2,000 mark.

The Canadian federal government is increasing its 25 per cent of the cost of unemployment relief formerly their share was one-third. The new rate is being strongly opposed by provincial and municipal authorities. At a conference in Ottawa July 30 they will reflect question whether to drop the demand.

Clark County, Arkansas, farmers kail down and prayed for rain last Friday. Saturday a cloudburst drenched the country.

Calgary city council is alarmed by the federal government's reduction in relief allowances. The Calgary scale of relief rates may be cut as a consequence.

A survey of the ground for Calgary's new military barracks is to be made this week. The federal government will spend \$1,200,000 on the relief construction program.

Alberta's most noted centenarian, Andrew Stibbald, died at Banff last Friday. He was 100 years old.

Bugay Mexican ten peso bank notes were passed off on two Calgary merchants early this week. The bills were made for the sum of \$100 each and they bear a close resemblance to Royal Bank of Canada ten dollar bills. Bankers say the Mexican bills are worthless.

In the last two days the 2-year-old Evelyn Rauch was found safe and unharmed Tuesday morning a mile and a half from her home near Rocky Mountain House. Alberta. "Our thoughts are with you in the search for the lost child. When found by a neighbor she said, "Hello, where's my daddy?"

Lightning rainfall is reported being over 100 mm. T. A. and his family of Coalville, Alberta, he said, were clearly defined, and appeared across the sky from east to west between 12:30 and 1:00 o'clock a.m.

Wheat growers in Great Britain have received subsidies totalling \$26,500,000 during the year ended July 31, 1934. Payments affect nearly 84,000 growers.

A big grain fed steer weighing 1,935 pounds was recently shipped from Taber to the Montreal market.

The Chinese are said to be good wheat growers as well as good feeders. One of the best grain crops in the Taber irrigated region is that of a Chinaman's farm. Some irrigated wheat fields in Taber district are expected to yield 50 bushels to the acre.

The longhorns' strike in San Francisco has rapidly spread among the cattle in the state. National guardsmen are using tear gas bombs and machine guns to control strikers in Seattle and San Francisco. A number of men have already been killed. Pacific coast news papers say the strike is fostered by communists.

Prime Minister Ramsay Macdonald is expected to land in Quebec today. He will be greeted by Premier R. B. Bennett. Mr. Macdonald will make a tour of Canada.

Cutting of winter wheat started in the Lethbridge district early this week.

Word comes from the relief commission at Regina that a total crop failure in fifty municipalities in south Saskatchewan is a certainty.

Stephen Johnson, former Bassano young man, is taking part in the rifle matches at Bisley, England.

Better manufacturers from the three prairie provinces are holding a conference in Regina. There is said to be a better surplus in Canada of 22 million bushels.

Fourteen year old George Wise, of Carbon, won the district No. 5 tennis singles championship last week. He is also provincial junior champion.

Brooks and Bassano Tennis Clubs To Play Here Sunday

Return Match Will Bring Rival Clubs Together for Net Honours—Men's and Ladies' Singles, Doubles, Mixed Doubles and Junior Matches All On That Day's Schedule

The friendly rivalry between Brooks and Bassano tennis clubs will be renewed on the local courts next Sunday, July 22. Officers of both clubs have arranged for the tennis contest which will feature a return visit from Brooks.

The eastern town entered Bassano club members May 24. On that occasion Bassano was by a margin of seven points, taking seventeen games to Brooks' ten.

Members of both clubs recall the splendid day's sport on the Brooks courts, and they are looking forward to another day of the same kind.

As the date of the tournament is

in the middle of the holiday season, a number of players from both clubs will be away on vacation.

The three clay courts of the Brooks and the asphalt and hard courts of Bassano will be arranged for the tennis contest, which will feature a return visit from Brooks.

The eastern town entered Bassano club members May 24. On that occasion Bassano was by a margin of seven points, taking seventeen games to Brooks' ten.

The new sunrise stands, built by Austin Ford, and installed a few weeks ago, will provide umpires with an comfortable seat and a good view of the court.

Rain Needed For Western Crops

OTTAWA.—Telegraphic advises on the condition of the crops in the prairie provinces "are becoming increasingly dry and parched and immediate rains are needed to prevent further decline in crop prospects."

In those words the Dominion Bureau of Statistics summed up the advice it received from 42 correspondents covering the past week Manitoba, Saskatchewan and Alberta.

"The past week of hot, dry weather," the crop report issued today declared, "has emphasized the shortage of reserve moisture and rains is now urgently needed over most of the west." Effective rainfall of late has been very light and unevenly distributed.

The recent period of drought has aggravated the grasshopper plague and the situation is described as increasingly critical. Migratory swarms are occurring but actual damage is limited to the southern districts.

"The Manitoba reports are quite pessimistic and distressing," advised from the southwest corner. There is no sign of any effective relief in sight. The wheat belt from the Peace River to Central and Northern Alberta where it was needed least.

"The recent period of drought has

aggravated the grasshopper plague and the situation is described as increasingly critical. Migratory swarms are occurring but actual damage is limited to the southern districts.

"The Manitoba reports are quite pessimistic and distressing," advised from the southwest corner. There is no sign of any effective relief in sight. The wheat belt from the Peace River to Central and Northern Alberta where it was needed least.

"The recent period of drought has aggravated the grasshopper plague and the situation is described as increasingly critical. Migratory swarms are occurring but actual damage is limited to the southern districts.

"The reports from Saskatchewan stress the adverse effect of the recent rains and the immediate need of heavy rains."

"Having greater moisture reserves Alberta crops are making better progress, but rains are needed in the south and centre of the province. Heavy rains in the western districts of the prairies during the week and crop prospects were better improved in these areas. Hail caused damage in several good crop districts of Central Alberta and west and north of Edmonton. Grasshoppers are numerous and are migrating. Damage is reported from scattered districts."

COUNTESS NEWS

COUNTESS, July 17.—M. E. Beck was calling on old friends at Countess' residence.

M. E. Ferguson arrived by motor last Wednesday from Colorado where he has been for the past five years. He will visit with his family for a couple of months before returning to Canada.

Mrs. D. Ferguson and family and Mrs. D. Ferguson were visiting at the Gamble home on Friday.

Mrs. Craig of Lethbridge is visiting with her daughter, Mrs. Geo. McIntosh.

Mrs. and Mrs. M. H. Gamble, Jean, Caryl and Darrel spent Thursday in Calgary.

Mrs. McRoberts was operated on for appendicitis in Calgary recently; she is doing fine.

Miss Thompson is spending a couple of weeks in Calgary.

May and Fred Bright, Billy Snape, Caryl, Darrel and Jean Gamble went for a short camping trip to the back water last week, returning on Saturday.

Mr. and Mrs. Ralph Robinson and family, and Mr. and Mrs. Billie, Mr. Robbie, and Pete MacLean were dinner guests at the Gamble home on Sunday.

BOY SCOUTS PLANT TREES

Ottawa, Canada—Young scouts are good doers, Canadian boy scouts are no exception, and the boys of the Ontario Scouts are no exception.

From March to June, the Ontario Department of Lands and Forests, who operate camp, but the scouts pay their own camp expenses. During

six days and a half, the scouts reforestation camp at Angus, Ontario, A thousand trees each have been planted this year by the 89 boy scouts attending. They are the first to be planted in the Ontario Department of Lands and Forests, who operate camp, but the scouts pay their own camp expenses. During

Mr. Justice Ives at least has some satisfaction of knowing what some or the people think of him. *Clarkeholm Local Press.*

Money is being raised to appeal Chief Justice Ives' decision on the MacMillan vs. Brownlee case. There may be a political influence behind this move, but not from that towards of persons would like to see the case go to a higher court.

Attendance at the Calgary exhibition and stampede was the largest in the last five years. If this is an indication of business prosperity, it would seem the old depression is on the wane.

In parts of southern Saskatchewan the year has been a complete failure due to drought and insect pests. Farmers are in a desperate situation; livestock is dying for want of feed and water. Farmers of this section may be getting along better now, but their prospects are not infinitely better than they are in the drought-stricken southern Saskatchewan.

Making Good Citizens

One of the most successful ventures launched by President Roosevelt in the civil conservation commission, according to Major W. A. Jones, Washington D. C., is

Thousands of acres of land are being reforested and reclaimed parks and game preserves are being established by the workers in these camps.

But material gain is not the only aim of the civil conservation camps, and perhaps the least important. The workers are enlisted from the youth of the land. They are given honest employment and good living quarters. They are not mere tools to be used from the interests of business, gamblers and racketeers; they are being moulded into good citizens. This is of more importance to the country than the saving of forests and the building of roads.

The civil conservation camps are set to be President Roosevelt's pet hobby. Whatever may be said of the president's national recovery act, his plan to rescue young men from the evils of indecision and underworld influence is worthy of praise.

A HOUSE LEAVING HOLLYWOOD

The campaign against "dirty" pictures is making itself felt in Hollywood. Many theatres in the United States have closed down, and others are having record declining receipts.

The Catholic churchmen started it and Protestant and Jewish churchmen have joined the move to clean up pictures.

Film moguls are worried over the public mind. Dr. Compton said it is important, but not all important. You much emphasize mental and spiritual values, where there is mystery and shine in professions for which they are not fitted.

The purpose of college education as I have always understood it, is to teach the student to take more room than other fellow but to have a better and happier life, whatever line of work he follows.

Picture producers are now fighting out the public wants clean entertainment. The taint of sensuality and Baudrillart sex interest are frowned upon by the average theatre-goer. He wants to see *"The Woman in White,"* and *"The House of Rothschild,"* and the capacity houses drawn by these pictures have proved how popular they are.

If Hollywood wishes to entertain the public, it will have to give the public what it wants.

LEAVE IT TO ELECTORS

(Vancouver Observer)

The observer feels it safe to say that the election of a new government of a government which has been under suspicion for three years. The electors want to clear the air. They are looking for a "new deal."

THE WISE WOMAN

She does not sigh for festing fame. However rare her gifts may be. Nor yearns for an illustrious name. Nor honors that the world may see.

Suffice it within four walls. She in her little realm may move. Whose laughter echoes through the halls.

And eye meets eye with looks of love.

She who is rich, though plain her food.

Here to her woman's heart she's true—

Unnoticed by the multitude. But graciously precious to a few!

Today and Tomorrow

by Frank Parker Stockbridge

PEOPLES and a few acres

My friend, and neighbor, Tom, had been in the States about 20 years.

When he arrived from his native Italy, at the age of 28, he had nothing but a few dollars in his pocket, a strong body, and a powerful strain of rugged honesty.

When he died almost a whole town turned out for his funeral. In those years in America Louis Carre, a man of great energy, had himself from a few mountain acres, land, reared a family of two sons and two daughters and settled them through high school, and that through a combination of his own trade for independence, integrity, straightforwardness, cheerfulness, and helpfulness to his neighbors.

Louis Raspuzzi by his life gave lie to the false and wicked notion that Americans are not honest.

He showed that Americans are not the land of opportunity, and that Americans cannot make their way the world over unless they are well educated and supported by the State.

He also showed that that

after that enabled the pioneers in three centuries ago to succeed in the face of obstacles far greater than those that confront any American today.

Raspuzzi brought to this new world the same character that these earlier pioneers brought, and that sort of character can still succeed as easily as it ever did.

LOCK-JAW

from the soul

and the soul of the锁jaw disease, which is commonly called lock-jaw. There is no place in which human beings have ever been found to have this terrible disease.

All that protects the hardened boy from this deadly infection is the fact that nature has provided the sole of the foot with such a tough skin as will not let any bacteria penetrate it. But any break in the skin that comes in contact with the soil is a possible source of danger.

Summer is lock-jaw time. Not so many years ago, however, our ancestors have been taught the danger of a sun-burned injury. It Cuba and other densely populated tropical regions the natives fear to walk on the ground without sandals or some sort to protect them from lock-jaw.

CHARACTER and education

I have been reading the addresses to their graduating classes at a dozen or so university presidents. Without exception, they all emphasize just the main emphasis we see on character. Brains are less important than honesty, integrity, charity and unselfishness.

President of Harvard told his graduates, and I quote, "about the way the rest of them spoke."

Intellect has been overpriced in the public mind. Dr. Compton said it is important, but not all important and you much emphasize mental and spiritual values, where there is mystery and shine in professions for which they are not fitted.

The purpose of college education as I have always understood it, is to teach the student to take more room than other fellow but to have a better and happier life, whatever line of work he follows.

Infringements of Game Laws

Infringement of the game laws of the province by the shooting of wild duck out of season has drawn plenty of attention recently tried at Lethbridge, where the game warden, George H. Tamm, was still under the impression that he could shoot under the half-breed permits which are no longer in effect, was fined \$10 and costs, and his gun confiscated while he claimed that he still understood the half-breed permits.

The game branch of the provincial government is prosecuting in every possible case of such infringement.

This charming design in practical pierce, button, gingham, tow or

Marketing Conference

Arrangements are being completed for the marketing conference and co-operative institute to be held at Olds school of Agriculture, July 21, 22 and 23 under arrangement with the Alberta Co-operative Association.

It is expected that such eminent authorities as Hon. H. H. Stevens, federal minister of trade and commerce, Mr. J. E. Booth, commissioner agricultural extension office, Hon. John L. Jackson, minister of agriculture, and others will be present to discuss the problems, as well as representatives of the various co-operative interest in the province. Hon. F. S. Galt, minister of agriculture, will also be present.

Dairy Production Grows

Although 1933 was not a large year in the dairy industry, production

of creamery butter, the present season, at least for the first half

of the year, shows an even greater increase.

The total amount of butter delivered to creameries from January to June inclusive has so far been 1,200,000 lbs. compared with 950,000 lbs. for the same period of 1932. This is an increase of 17.1 per cent. The largest increases have been in the central and northern sections.

Household Hints

Drop a few lumps of sugar in the rinse water to dainty lingerie and it will take the place of the usual starching, making it beautiful after ironing.

To be sure that net curtains will hang straight after laundering, put them on the poles at the window while they are still wet. When they dry they'll fall in graceful folds.

Another method for removing the starch is to boil the cloth. If milk and soapstone to which soap has been added. Wash off the starch and the starch will disappear.

Boil the cloth silk on a wooden washboard sponge the silk with a piece of raw starch in lukewarm water.

Filaments should be washed in tepid water with a pure white soap. The water should be very cold, and the soap should be dissolved in tepid water.

A good cleaning mixture for removing spots is made of 12 drops of iodine dissolved in 3 drams of chloroform and 1 pint of naphtha. This may be soaked in this mixture overnight, rinsed, and then dried in the sun.

Boiling glove linings, when accidentally dropped on clothes, simply hold a piece of ice over the spot until the glove is cold enough. Then rub down the garment at the same time the glove is scraped or brushed off readily.

Velvet, held over a gallon of hot water to which a half cup of ammonia has been added, will be restored to its original fresh appearance. The pile of the velvet should be held upright.

Pinhole Plat Frock

PATTERNS 2207 A neat simple and little apron dress to slip into for a hot day is useful in any small garden and one would look long and earnestly before finding a more deplorable apron than this.

A mother could have this pinhole plat frock sewn for her by following the step by step sewing instruction given which clearly explains each step necessary in making the garment.

This charming design in practical pierce, button, gingham, tow or

any other material where the wearer

is to be seen, is a good idea for

the summer months. The

linen is fine at 30s and the

gingham at 20s.

Designed in Sizes 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, Alberta Crop Report

Issued by the Department of Agriculture, Edmonton, July 14, 1934.

All crops in Alberta are at present making good progress under more or less ideal growing conditions, with the exception of east-central section where early dryness and hoppers have left their mark, and where July rains have not been as heavy or frequent as in other areas. In this section the grain crops will be light.

The easiest ways are the usual ways by which disease germs are passed from one person to another. Most of the disease germs which we carry around with us can leave the body in the droplets of saliva and mucus. It is the transmission of these germ-laden secretions which accounts for the spread of germ diseases.

In the act of coughing, sneezing, shouting, talking, passing a cold, anyone who is ill or finds himself with these particles, if they gain entrance to the nose or mouth of the person within reach of them, carries the disease with him which may in the course of months affect the individual emitting them. In the act of kissing, the transfer is more direct and more certain.

During the summer, there are few colds but many few coughs, sneezes, etc., are passed on in this manner, which means that those who have less chance of being near those who cough and sneeze or talk at close range. The result is that this manner of spread of disease gives the colds a more frequent incidence than the actual frequency in which it is in winter.

Another easy way for disease germs to be passed, is by the use of unsterilized eating utensils. This happens even in the home, so it is particularly important that we not use the same utensils which can occur more easily in restaurants or at soda fountains where the same utensils are used by a number of patrons within a short space of time.

There is not the same amount of danger in the home because dishes are not used by a large number of people, and there is usually time for many of the germs to be destroyed by the ordinary washing processes, but the second most frequent method of spreading disease germs is the secretions of the nose which may contain disease germs. Paper cups and dishes are used only once or, of course, not at all.

You can be satisfied as to your own safety if the restaurant and the soda fountain which you patronize, are regularly inspected by a health department which has the authority to require the sterilization of all eating utensils and the sanitary preparation of foods. The latter will be assured personally by the task of health departments.

What happens depends upon what is done to the eating utensils after they are used.

If, after having been washed, they are placed in water that is hot enough to kill the germs, but are afterwards taken out, then the second most frequent method of spreading disease germs is the secretions of the nose which may contain disease germs. Paper cups and dishes are used only once or, of course, not at all.

tricts, but while the temperature has dropped to low points in one or two of these districts, the damage has thus far not been severe or extensive.

Most of the wheat in the province is headed out and generally speaking is in a good healthy stand, with rank growth in some of the central districts. Corn crops are also heading out and showing good progress. Haying is progressing, and the aggregate crop will be fairly substantial, although light in average weight. Late fall "heavy" feed crops give promise of quite "heavy" yields, and there is every indication of a very much improved feed situation this fall.

There appears to be a more contented feeling among the rural population in the province, based upon the greatly improved general crop outlook. A very keen interest has been shown in the various field days held. There is a gratifying interest in farm work in central and northern districts, for Yorkton districts, indicating the increasing determination to improve the quality of hogs. Cattle are in good condition, but producers are somewhat anxious about the proposed restrictions in hog production, and the market price of hogs in central Alberta is lower than in the west. Farmers in central Alberta, through cattle under the rancher-farmer contract system have marketed their finished product in most cases to best advantage, and have realized a profit. The market price of hog production has shown a marked increase for the first part of the year, over last year's high record. Prices have been maintained on a fairly satisfactory basis, but weakness outside markets has been reflected in somewhat lower price levels here.

ORPHEUM THEATRE

FRIDAY ONLY THIS WEEK

"Little Women"

Starring Katharine Hepburn. One of the greatest box-office attractions ever produced. This is one picture you must see. The final chapter of the serial will be included in this week's bill.

SATURDAY ONLY THIS WEEK
"Three Cornered Moon"

A Feature Attraction Coming
"Eskimo"

An epic from the edge of eternity. A mighty drama of love, desire and bitter hate revealing the strangest moral code on the face of the earth.

taught that season.

Alfalfa is fit to cut for seed when about three-fourths of the pods have turned brown but often this condition is not obtained much before fall frosts occur. The ripe seed will not injure the frost and cutting will not injure the plants away. Cutting is probably best done with the grain binder, making the sheaves small and stocky, as with grain.

The handling of the seed crop where no special equipment is available is not in itself difficult, as quite good results may be obtained with the ordinary equipment found on the farm. The chief difficulty lies in the fact that alfalfa produces seed in rather erratic fashion. A hot dry season provides the most satisfactory climatic conditions for seed production. At the Dominion Experimental Station at Lethbridge in 1933, the early part of the same year particularly favored vigorous plant growth with the result that alfalfa set no seed worth while in the hot dry weather. Alfalfa seed is produced under drier conditions than most other grasses and must be harvested when the cylinder must be returned to the cylinder until threshed. The threshed seed will leave the machine through the seed seed opening.

For good results the alfalfa must be dry and should be fed into the machine when dry. The threshed seed will contain broken pod and other matter but these can be removed with the farming mill. The threshing and cleaning require careful and laborious work to obtain satisfactory results. Small lots of alfalfa for seed may be cut with a scythe and when thoroughly dry threshed with a flail.

Surprised

An intimate friendship between two middle-western Congressmen existed for many years. Walking down Washington Avenue one day, they observed a drove of mules passing up Pennsylvania Avenue.

"Ha! A group of your countrymen here to see you," said one.

"Yes," was the reply, "but they are getting along well. They're applying for jobs as school-teachers in your state."

She: "What makes that head walter bow to you every time we come into this place?"

He: "A pound note, my dear."

For Health... BEER IS BEST

The good drink brewed from BARLEY-MALT

The finest grades of barley are known as 'malting quality' and the choicest of all 'malting quality' is reserved for BEER.

That is why you get the full benefit of that sovereign digestive...MALT...when you drink BEER.

NOTICE TO CREDITORS AND CLAIMANTS

IN THE MATTER OF THE ESTATE OF
CHRIS ANDERSEN, DECEASED

IN THE PROVINCE OF ALBERTA
ALBERTA, CANADA

NOTICE is hereby given that all per-
sons having claims upon the estate
of the above named CHRIS ANDERSEN
SKEN who died or about the 16th
day of February, A.D., 1934, are re-
quested to file their claims with me
within the month of August, 1934.

Jack Wallace and family, of the
Neilson Ranch north of Glen, passed
through Bassano last Sunday on their
way home from the Calgary stampede.

Many cars passed this town last
Sunday on the way home from the
Calgary fair. One motorist from the
district south of Regina, Sask., said
that the roads were very poor this year.

The last car they saw was held in
the year 1922.

Mrs. Margaret Beader left Monday
morning for Victoria, B. C., where
she will visit indefinitely with relatives.
She contemplates entering the teaching
profession.

Mrs. W. F. MacBeth and two
daughters left Monday morning for
Peckover, Ontario, on a summer
vacation. They were accompanied by
Mrs. Brown, mother of Mrs. Mac-
Beth.

N. Bassano took Morley morn-
ing's train to Banff on his summer
holiday. He planned to go on to
Vancouver.

Mr. and Mrs. H. H. Beader and
family and Mr. and Mrs. W. E. Stan-
brook and family visited the C. G.
L. T. camp near Arrowwood last Sun-
day. Ten local girls are at the camp
and the visitors reported all were
well and "playing a jolly time."

A. E. Thompson left Saturday
for New Brunswick. On his return
he will visit the world's fair in Chi-
cago.

Mr. and Mrs. M. R. Milton were
in Calgary Saturday and attended
the opening of their daughter Nor-
ma. Mr. and Mrs. Jim Simpson also
were present.

Mrs. Gordon, of Calgary is a guest
at the home of Mrs. H. J. Shire.

Mr. and Mrs. D. Cather left last
Saturday to spend a holiday in Bow
River, Alberta, with their daughter
Mrs. J. W. Bullock.

Mrs. T. N. Simpson, Miss Betty
White and A. Simpson were visitors
to Calgary last Saturday.

Miss Dorothy Thompson, of Count
ess is a guest of Mrs. J. H. Sillies.

Art Thompson was home last Sat-
urday from Empress, where he has
been working.

A MILLION OF THEM
Ten years ago I went to Amer-
ica with one pair of patched trou-
sers and I have returned with a
million."

"What on earth are you going to do
with them?"

The first pumpkin pie was made
by cutting a hole in the pumpkin, ex-
tracting the seeds and fibrous mat-
ter, filling the cavity with apples,
spices, sugar and milk, and then
baking the whole.

Possible

The teacher was telling his class
about the conquests of Alexander
the Great. He made the title a stir-
ring one.

"When Alexander had conquered
the Persian Empire, what do you think
he did? Do you think he gave a great
feast to celebrate his triumph? No,
he sat down and went to sleep."

The children seemed a little dis-
appointed at this childish exhibi-
tion on the part of the hero, so the
teacher continued. "Now, why do you
think Alexander slept?" he asked.

Up went a little hand.

"Well, Tommy?" said the teacher.
"Please, sir," said Tommy, hesitantly,
"perhaps he didn't know the
way back."

LOCAL NOTES

W. S. Welt arrived home early
Monday morning after a quick motor
trip from Vancouver. He left
Westminster at 12:15 p.m. Saturday,
cleared customs at Blaine 1:45
p.m., and going by way of Everett,
Fall City, Spokane, he crossed the
international boundary line again at
Kamloops 12 o'clock noon Sunday.
He reached Bassano at 2:30 p.m. Sunday

morning. Shere says the old
model T Ford was going the limit
but Welt had a new one.

A sewing demonstration under the
auspices of the W. C. T. U. was held
yesterday, Tuesday, and Wednesday
and Wednesday night, July 23, 24
and 25. Anyone interested is invited to
join the class. For further information
phone or see Mrs. Corbett.

The sewing class will be held in
Reid & Mirrey's store.

Lloyd Leonard left last Sunday for
Glenbow Park. "He has a job as
lithotype operator on the Grande
Prarie Herald."

Horace Brown motored up from
Patricia last Sunday afternoon, for
some tennis practice on the local
court. He plans to play in the
Alberta Open tournament, Edmonton,
early in August.

Mr. and Mrs. Allyn Johnson came
down from Calgary last Sunday.
Mr. Johnson returned to the city
in the evening. Mrs. Johnson and
her boy will remain in Bassano for
a visit with her parents. Mr. and Mrs.
Jas. Johnson.

Jack Wallace and family, of the
Neilson Ranch north of Glen, passed
through Bassano last Sunday on their
way home from the Calgary stampede.

Many cars passed this town last
Sunday on the way home from the
Calgary fair. One motorist from the
district south of Regina, Sask., said
that the roads were very poor this year.

The last car they saw was held in
the year 1922.

Mrs. Margaret Beader left Monday
morning for Victoria, B. C., where
she will visit indefinitely with relatives.
She contemplates entering the teaching
profession.

Mrs. W. F. MacBeth and two
daughters left Monday morning for
Peckover, Ontario, on a summer
vacation. They were accompanied by
Mrs. Brown, mother of Mrs. Mac-
Beth.

N. Bassano took Morley morn-
ing's train to Banff on his summer
holiday. He planned to go on to
Vancouver.

Many cars passed this town last
Sunday on the way home from the
Calgary fair. One motorist from the
district south of Regina, Sask., said
that the roads were very poor this year.

The last car they saw was held in
the year 1922.

Mrs. Gordon, of Calgary is a guest
at the home of Mrs. H. J. Shire.

Mr. and Mrs. D. Cather left last
Saturday to spend a holiday in Bow
River, Alberta, with their daughter
Mrs. J. W. Bullock.

Mrs. T. N. Simpson, Miss Betty
White and A. Simpson were visitors
to Calgary last Saturday.

Miss Dorothy Thompson, of Count
ess is a guest of Mrs. J. H. Sillies.

Art Thompson was home last Sat-
urday from Empress, where he has
been working.

A MILLION OF THEM
Ten years ago I went to Amer-
ica with one pair of patched trou-
sers and I have returned with a
million."

"What on earth are you going to do
with them?"

The first pumpkin pie was made
by cutting a hole in the pumpkin, ex-
tracting the seeds and fibrous mat-
ter, filling the cavity with apples,
spices, sugar and milk, and then
baking the whole.

Possible

The teacher was telling his class
about the conquests of Alexander
the Great. He made the title a stir-
ring one.

"When Alexander had conquered
the Persian Empire, what do you think
he did? Do you think he gave a great
feast to celebrate his triumph? No,
he sat down and went to sleep."

The children seemed a little dis-
appointed at this childish exhibi-
tion on the part of the hero, so the
teacher continued. "Now, why do you
think Alexander slept?" he asked.

Up went a little hand.

"Well, Tommy?" said the teacher.
"Please, sir," said Tommy, hesitantly,
"perhaps he didn't know the
way back."
